Personal Details.Q: Finding the critical line for a set of algebraic equations I am trying to find a particular line where the determinant of the resulting quadratic form is zero, the line through  $x=(0,0,0)$  and  $y=(1,1,1)$ . I am trying to do this in Java. The first step is to find a matrix representation of the form  $(a + bx + cy)(dx+ey+f)$ . In this case that is  $3x^2-2x+y^2-2y$  However, the correct form would seem to be  $3x^2-2x+y^2-2y-x^2+4y-2x$  but in this case the determinant is no longer 0 when  $x=1$  and  $y=1$ . How can I go about finding the correct critical line? A: Let  $A = \begin{bmatrix} 1 & 0 & 0 \\ 1 & 1 & 0 \\ 0 & 1 & 1 \end{bmatrix}$ , then  $A = O + \begin{bmatrix} -1 & -1 & -1 \end{bmatrix}$ . The  $3 \times 3$  matrix  $B = -2O$  is symmetric, hence has a characteristic polynomial of  $\lambda^2 + \lambda$
